

To all our current program ice users:

Approximately two months ago we became aware that our last day for ice at the VBC would be December 6. We began discussions with city officials and construction supervisors at that time to determine how we provide ice for our patrons to continue their programs, stressing the fact that we just needed access to the ice. With approval from the Fire Marshall, we were granted limited use occupancy beginning December 7, so that your programs could continue uninterrupted. The result was that we transitioned from VBC on December 6, to the Ice Sports Center December 7, even though the renovation is not complete and we do not have access to many areas of the facility.

Because we were granted permission to utilize the ice **prior to completion** of the project, patrons may notice that many items related to our renovation are **not finalized**. Ideally, we would have liked the renovation to be complete before returning, but ensuring minimal disruptions to your programs has always been our top priority. Your continued patience is appreciated as the final stages of this project are completed. The crews are working diligently to complete the renovations as quickly as possible and with minimal disruption. We are very excited for everyone to enjoy ALL of our new features and amenities when the work is done and the construction team has departed. **We promise** it will be worth the wait!

Thanks again for your patience,

Ice Sports Center Management
